

NORTE

Code: GK-RO-201

Description

Playground roundabout with a diameter of 1,32 m and four handles connected with post installed in the middle of the carousel. The floor is covered by PE plate. Thanks to this solution the roundabout's floor is soft and safer and anti-slip. Moreover, it is not heating during sunny days and it is not freezing during the winter.

Playground device consists of

- 1x platform
- 1x post with three handles
